Profile

Production-focused DevOps Engineer with hands-on ownership of **200+ Linux production servers**, multi-cloud infrastructure (AWS & Azure), and mission-critical CI/CD pipelines. Recognized with the **Uffizio Emergency Response Champion** award for exceptional incident resolution under pressure. **Deployed internationally to Dubai, UAE — twice —** for high-security government client infrastructure setup. Deep expertise spanning JVM diagnostics, socket/memory leak forensics, Kafka, and observability — consistently converting production incidents into documented preventive solutions.

Technical Skills

- **Cloud:** AWS (EC2, ECS, IAM, S3, SES, CloudTrail, VPC), Azure (MySQL Flexible, Static IP, NSG)
- **CI/CD & Automation:** Jenkins, GitLab CI, GitHub Actions, Ansible, Bash, Python
- **Containers & Infra:** Docker, AWS ECS, Nginx, Apache, Tomcat, Linux (Ubuntu / CentOS)
- **Databases:** MySQL, MongoDB, Cassandra, Redis, PostgreSQL (PostGIS)
- **Messaging:** Apache Kafka, Zookeeper, RabbitMQ, MQTT
- **Observability:** Grafana, Datadog APM, Zabbix, New Relic, Zenduty, UptimeRobot
- **Security & Network:** TLS/SSL (GoDaddy, Let's Encrypt), iptables, mTLS, Security Groups, VPN
- **Diagnostics:** JVM/JFR, jcmd, jstat, SonarQube, SpotBugs, strace, netstat/ss
- **Languages:** Python, Bash, SQL

Professional Experience

DevOps Engineer ▪ **Uffizio Technologies**

Sept 2025 – Present | Vapi, India

🏆 **Uffizio Emergency Response Champion** — Awarded for exceptional incident response & production crisis leadership

✈️ **International Deployment — Dubai, UAE (2x on-site)** — Led full production infrastructure setup at a government client facility in a controlled, air-gapped, high-security environment

INFRASTRUCTURE & OPERATIONS

- Owned and maintained **200+ production Linux servers** (24×7) supporting a global GPS tracking platform (Trakzee) serving enterprise fleet clients.
- Designed, owned, and debugged **Jenkins, GitLab CI, and GitHub Actions** pipelines; embedded SonarQube & SpotBugs quality gates into every build stage.
- Authored Bash/Python automation eliminating **3+ hours of manual effort** per deployment cycle; scripts cover provisioning, health checks, and auto-restart with alerting.
- Managed AWS (EC2, IAM, VPC, S3, SES, CloudTrail, Security Groups) with continuous cost optimization; configured **Azure MySQL Flexible Server** privilege grants across 6+ users on a PaaS-restricted environment.
- Configured **TLS termination for Teltonika FMC150 GPS devices** via Nginx stream proxy with a GoDaddy SSL certificate on nxgsfleet.com; deployed to air-gapped on-prem server via USB transfer.

INCIDENT RESPONSE & DIAGNOSTICS

- Diagnosed **Metaspace/classloader memory leak** on gridzee Tomcat server (Spring/AspectJ) using jcmd heap dumps and jstat GC trend analysis.
- Investigated **CLOSE_WAIT socket accumulation** (5,000–9,200+ sockets) across multiple servers; pinpointed root cause to missing socket.close() calls in Java COMServer and LocationShareSocketServer; authored full RCAs with preventive fix.
- Leveraged **Datadog APM** traces to isolate a long-running WebController.getReportData endpoint causing heap exhaustion and 160+ leaked connections on ultrakzee19-web.

- Built production FD monitoring scripts (`fd_monitor.sh`, `pre_restart_collect.sh`) with Java service auto-detection, Python 3 SMTP alerting, and MongoDB remote diagnostics via `sshpass`.
- Resolved **DNS/IPv6 failure** impacting mobile clients on Airtel Rajasthan NAT64/DNS64; corrected by enabling IPv6 on AWS EC2 and adding AAAA record in GoDaddy DNS.

KEY PROJECTS

- **Dockerized COMServer on AWS ECS** with end-to-end GitLab CI/CD — enabled automated builds, zero-touch deployments, and rollback capability.
- **GIS Tile Server Migration** — moved MapServer/MapCache to UAE-region falcon server; resolved MapServer 7→8 breaking changes, configured 5 MapCache endpoints, PostGIS + memcached stack.
- **MySQL Partition Cleanup Automation** — built `gps-partition-cleanup.sh` with disk-pressure-triggered TRUNCATE; supports both monthly and daily partition naming conventions.
- **RabbitMQ/MQTT Stability** on `cltrakzee26-comserver` — tuned heartbeat/keepalive, added cron monitoring, integrated `ntfy.sh` push alerts for CLOSE_WAIT spikes.
- Produced: security group docs, server infrastructure spec, `ET_deployment_flow_v2` deployment guide, AWS CloudTrail security analysis, and **UAE National Cloud Security Policy v2.0 compliance report**.

DevOps Intern ■ IAMOPS

Jan 2025 – July 2025 | Remote

- Deployed two-tier web application on **AWS ECS** using Docker; integrated Slack real-time alerting for infrastructure events.
- Configured and hardened Nginx & Apache; deployed **Uptime Kuma** monitoring with SSL-terminated Nginx reverse proxy scheduled via Bash/Cron.
- Conducted **AWS cost analysis** and resolved Security Hub vulnerability findings; produced remediation action plans.
- Completed AWS Cloud Practitioner and AWS Solutions Architect Associate training via KodeKloud.

Awards & Certifications

- 🏆 **Uffizio Emergency Response Champion** — Production crisis leadership & rapid incident resolution
- ✈️ **International Deployment Recognition** — Dubai (UAE) Government Client Infrastructure Setup ×2
- ☁️ AWS Cloud Practitioner — In progress (KodeKloud)
- ☁️ AWS Solutions Architect Associate — In progress (KodeKloud)

Education

B.E. in Information Technology	2025
A.D. Patel Institute of Technology, Vallabh Vidyanagar ■ CGPA: 7.97	
Higher Secondary Certificate (HSC)	2021
CBSE, Pardi, Gujarat ■ 90%	

Languages

English (Professional) Hindi (Fluent) Gujarati (Native)
